

## Electronics Technician

**Job ID: 23-01**

**Location: Lebanon, NH**

**Job Type: Full-Time, Exempt**

White River Technologies, Inc. (WRT) is a dynamic and growing technology company. Located in scenic Lebanon, New Hampshire, WRT has a great team of scientists and engineers that develops new solutions using magnetic, electromagnetic, radar, and acoustic sensors for defense, environmental, and energy applications. WRT is a national leader in underground mapping and has a reputation for delivering innovative solutions to complex problems.

If you have enjoyed working on your car or household appliances, have worked in the capacity of a technician, are looking for a new challenge, and would like to continue to grow your skills, White River Technologies, Inc. is seeking a self-starting and hands-on Electronics Technician. Applicant will be taught what is needed to support the manufacture of sensor hardware assembly and testing.

White River Technologies, Inc. is a small, high-tech company focused on research & development, testing, evaluation, and commercial support services for geophysical sensor and software technologies. Keys to success: high-level of personal reliability, strong communications skills, attention to details, and a positive team-player personality. Positions are immediately available.

### Essential Duties and Responsibilities

- Work daily in WRT facilities in Lebanon
- Work with small and delicate parts and assemblies
- Support assembly, repair, and maintenance of electronic systems
- Perform tests of equipment and generate reports in the office and outdoors
- Soldering of wires and components on Printed Circuit Boards
- Wire harness production and integration
- Operating Power supplies and oscilloscopes
- Work as a member of a team and explore ways to improve our quality and efficiency

### Education, Experience, and Skills

- High School diploma/GED, trade school, or other relevant technical experience
- 0-5 years of experience working with electromechanical devices
- Basic computer skills on a Windows operating system: email, word documents, copy files, etc.
- Comfortable with basic hand tool use: screwdriver, pliers, drill, etc.
- Knowledge of multimeter and other basic electrical equipment usage
- Demonstrated aptitude to quickly learn new technologies required
- Demonstrated adaptability, flexibility, perseverance, and a positive attitude required
- Responsible, dependable and ability & desire to learn new skills
